Project

Portfolio Website

- Created a **Frontend website** which describes about me personally and professionally
- Technologies used in this project are: HTML, CSS, JavaScript and Bootstrap.
- Link: <https://nehakharche06.github.io/PortFolio/>

Stock Management

- Implement the **Java Project** which involves management of all the products, sales, customer and many more.
- It keeps track of the products that has been purchased, products quantity available, Customer list, etc.
- This helps us to track your goods throughout your entire supply chain, from purchasing to production to end sales.
- Technologies used in this project are: Java, MySQL.

Cp Contest Notifier

- Chrome Extension** that helps users to track competitive coding contests across various platforms.
- Frontend using HTML, CSS and JavaScript. Used Clist API to fetch Data and rendered using D3.js
- Used Chrome Extension Notification Feature to get notified on the user device for selected contests
- Retrieved data from LeetCode using Web Scrapping Algorithm & implemented using random question generator.
